ABSTRACT

The Council of the Great City Schools proposes that Pennsylvania overhaul the formula for funding its public schools in order to provide Philadelphia and other poor and minority communities with resources equivalent to those in the highest achieving school districts in the Commonwealth of Pennsylvania. The proposal has two goals: (1) to propose a specific funding formula that would close identified school financing gaps; and (2) to provide an approach for considering variations on this proposed funding formula that would address equity issues. The proposal is based on a school finance adequacy model introduced in this report. The model that is the basis of the proposal calculates the revenue levels of the highest performing school districts and adjusts enrollment according to student poverty, English proficiency, and disability. The model then determines the share of adequate funding that the state and each local community would provide. The proposal uses data from the 1995-1996 school year; the most recent data available to the public. Although the proposal does not address the issue of property taxes or any other taxation method to support public education, it does address the regressive effect of property taxes by lessening their influence. Appendixes contain draft legislation to implement the proposed funding formula and a chart of proposed effects for state school districts. (SLD)

A Proposal for Funding the Philadelphia Public Schools

The Council of the Great City Schools proposes that Pennsylvania overhaul the formula for funding its public schools in order to provide Philadelphia and other poor and minority communities the resources equivalent to those in the highest achieving school districts in the Commonwealth. The proposal has two goals:

1. To propose a specific funding formula for the Commonwealth that would close the school financing gaps identified in Part I of this report; and

2. To provide an approach for considering variations on this proposed funding formula that would address the equity issues raised in Part I.

This proposal is based on the school finance adequacy model introduced in Part I of this report. Its premise is that each school system ought to have the same resources as the highest performing districts in the state, after adjusting for the needs of the children. This premise is valid when the Commonwealth's goal is high achievement for all students.

The model that forms the basis for this proposal calculates the revenue levels of the highest performing school districts; adjusts enrollment according to student poverty, English proficiency, and disability; and then determines the share of adequate funding that the state and each local community would provide.

This proposal uses data for the 1995-96 school year, the most recent available to the public, but was constrained by the unavailability of data on certain variables. Data were not available, for example, on aggregate achievement scores for each local educational agency in the Commonwealth. Nor were more up-to-date data available on property valuation per school district.

Finally, the proposal does not deal with a number of issues in which the Commonwealth might be interested. It does not, for instance, address the issue of property taxes or any other taxation method to support public education. It does, however, address the regressive effect of property taxes by lessening their influence. And this report also does not speak to where additional funding to support this proposal might come from.

A. An Adequate Foundation

This proposal for changing Pennsylvania's school funding formula begins by identifying a basic level of funding--or foundation amount--that would be necessary to provide a high standard of education to the average student in the state--i.e., a student not living in or near poverty or having other high-cost educational needs. Because Pennsylvania did not have a fully developed system of educational standards and assessments in 1995-96, this report uses the achievement levels attained by the highest performing school districts in the state and the resources available to them. This foundation amount[a] would be guaranteed to all students in the state and distributed to local school districts on a per pupil basis according to each district's average daily membership[b].

---

[a] The foundation amount would be increased each year using an inflation factor. The legislation in Appendix A makes reference to the consumer price index to adjust foundation amounts each year, but there are other methods for adjusting for inflation besides the CPI, and those methods should be evaluated for their ability to capture costs that are related to education and to differential costs in urban areas.

[b] This proposal uses the same definition of average daily membership as used by the state. "Average daily membership" is generally preferable to "average daily attendance" in measuring enrollment because of the variations in how attendance rates effect school systems that must plan and pay for space and books regardless of whether students attend school on a regular basis.

The model used to develop this proposal provides two alternatives for determining adequate funding: the first originated in Maryland and the second in Massachusetts. In Maryland, the 1994 Governor's Commission on School Funding[c] defined--but never implemented--a foundation amount according to the average per pupil expenditure of three high-achieving districts in the state. That amount--if fully funded--was $5,418 at the time. This approach was tagged to student achievement or outcomes, and is the method used in this proposal for the Philadelphia Public Schools and for the Commonwealth of Pennsylvania.

The second approach was developed by the Massachusetts Business Alliance ("MBA"),[d] after consulting with school superintendents across the state. It determined a foundation amount based on the functional expenses of a school system, including student/teacher ratios, maintenance expenditures, support personnel, teacher training, and budgets for computers and educational supplies.[e] The MBA study concluded that it took $5,000 in 1990-91 to provide an adequate education to a student with average educational needs in Massachusetts. This approach is an expense-based or input model using a traditional "opportunity-to-learn" standard.

The proposal for Pennsylvania employs the Maryland Commission approach for two reasons. First, the Commission model is oriented inherently towards "standards or outcomes" in a way that is consistent with the nation's educational reform movement. Second, the Maryland Commission approach is simpler and takes less time, while the MBA model does not necessarily lead to better results and relies heavily on the ability to gain consensus on the specific inputs and their costs. Most important, however, the MBA model is not directly tied to the academic performance of students.

The first step in this proposal for Pennsylvania, using the Maryland Commission approach, involved ranking all local educational agencies in the Commonwealth by their achievement scores. This report uses 8th grade reading and math scores on the Pennsylvania System of School Assessment (PSSA), but other grades and subject areas could be used without substantially altering LEA allocations.

The second step entails determining which districts are high achieving and which are not, a task made more difficult by the lack of aggregate LEA achievement data for the Commonwealth. This proposal defines high achievement as any LEA where 50% or more of the schools in a district have at least 25% of their 8th grade students tested scoring in the highest quartile in reading and math on the PSSA. Some 33% of the districts in the Commonwealth meet these criteria.

The threshold for defining highly-achieving school districts under this model may vary from state to state, depending on the number and structure of school systems and the range and type of achievement scores. Generally, the model uses jurisdictions in the top 5-35% in the state.[f]

Step three involves calculating the average per pupil expenditure of the highest performing 33% of school districts in the state. The result serves as a proxy for the cost of an adequate education to the average student. The average per pupil expenditure for the highest performing 33% of LEAs in Pennsylvania was $7,630 in 1995-96 (compared to the statewide average of $7,260). To validate this method, the per pupil expenditure in the highest achieving 5% of school districts was determined to be $8,892; and in the lowest performing 5% to be $7,368—including Philadelphia with its 1995-96 per pupil expenditure of $6,860.

---

[c] The Report of the Maryland Governor's Commission on School Funding, January 1994.

[d] *Every Child a Winner: Proposal for Legislative Action, Plan for Systemic Reform of Massachusetts' Primary and Secondary Education System*, an April 1991 study by the Massachusetts Business Alliance for Education.

[e] Funding for school lunch and breakfast programs and for transportation was excluded from the budget model.

[f] Larger percents are required for states like Pennsylvania that have larger numbers of school districts.

This proposal guarantees that all LEAs in the Commonwealth would receive the foundation amount or at least $7,630 per child, before adjusting for student needs.

B. Special Needs

The second step in this proposal requires that the foundation amount ($7,630) be adjusted according to the educational needs of the children in each district. These adjustments can be made in two ways. Both methods are based on research showing that children with specified needs are more expensive to educate to the same level of achievement than children without these needs. The first and preferred method was developed by Kern Alexander[f] and has been extensively used by the U. S. General Accounting Office. It weighs high-cost students and multiplies the weights by the number of students in each category of need. For example, when calculating a school district's enrollment, Alexander counts a student living in poverty as 1.5 students.

These weights were based on Alexander's estimation of the additional costs associated with educating each category of student; in other words, he calculated that a poor child was approximately 1.5 times as expensive to teach to the same level as the non-poor child. Where schools enroll high concentrations of students living in or near poverty, pupils might be weighted with a higher factor. Additionally, special education students could be weighted according to the level of services that they receive.

The second approach comes from the unimplemented Maryland Governor's Commission on School Funding and adjusts the per pupil foundation level by specified dollar levels for each category of need. Unfortunately, the adjustments--particularly for students eligible for free and reduced priced lunch, LEP students, and gifted and talented students--were the results of political compromises by the Maryland Commission and not the result of empirical attempts to determine how much additional funding such students require.

The Council of the Great City Schools used the first approach in its analyses of Pennsylvania because of its simplicity. Weights similar to those developed by Alexander and by the GAO were used for this proposal (see Table on next page). The proposal uses a weight of 1.2 rather than 1.5 to adjust for poverty; 2.3 rather than 2.5 to adjust for severe physical and mental disabilities; and 1.15 for students with a learning disability. The average daily membership of each LEA in Pennsylvania was adjusted according to the number of students weighted by their respective needs. The actual enrollment of Philadelphia in 1995-96 would change, for example, from 212,881 students to an adjusted or "virtual" enrollment of 262,736 (+23.4%).

The virtual enrollments are then further adjusted for "concentrated need"—based on the research indicating that concentrated poverty is more detrimental than isolated poverty. This proposal used a weight of 1.042 for districts with poverty in excess of 50%; a weight of 1.021 for districts with poverty between 50% and 25%; and a weight of 1.0 for districts with poverty less than 25%.

The final set of weights was based on "district size"—with smaller districts receiving larger weights to compensate them for the inability to use scale to their advantage in purchasing and administration. A weight of 1.042 was assigned to districts with enrollments under 5,000; a weight of 1.021 to districts with enrollments between 5,000 and 100,000; and a weight of 1.000 for districts with enrollments over 100,000. (Only Philadelphia falls into the last category.)

---

[f] Kern Alexander. "Testimony Concerning Federal Funding of Elementary and Secondary Schools" presented before the Subcommittee on Elementary, Secondary and Vocational Education, Committee on Education and Labor, U.S. House of Representatives, November 7, 1991.

Comparisons of Weights Assigned to High Need Students

Category of Need[h]	Alexander Weights	GAO Weights	CGCS Adequate Funding Proposal Weights[i]
Student Without Special Needs	Weight equals 1.0	Weight equals 1.0	Weight equals 1.0
Students Living In or Near Poverty	Weight equals 1.5	Weight equals 1.2	Weight equals 1.2
Students With Disabilities	Weight equals 2.5 depending on the severity of the disability	Weight equals 2.3	Weights equals 2.3 for severe physical and mental disabilities and 1.5 for learning disabilities.
Students Who Are Limited English Proficient	Weight equals 1.1	Not applicable	Weight equals 1.1
Students Who Are Gifted and Talented	Weight equals 1.1	Not applicable	Not applicable
Concentrated Poverty of LEA	Not applicable	Not applicable	Weight equals 1.0 if LEA enrollment is less than 25% poor; 1.021 if LEA enrollment is between 25% and 50% poor; and 1.042 if LEA enrollment is above 50% poor.
District Size	Not applicable	Not applicable	Weight equals 1.042 for LEAs with enrollments under 5,000; 1.021 for LEAs with enrollments between 5,000 and 100,000; and 1.000 for districts with enrollments over 100,000

The effects of this kind of a weighting system are comparable to the kind of flat, targeted grant structure used in the Maryland work, except that weighting has the advantage of automatically increasing as the foundation increases. In 1991, approximately 40 states—including Pennsylvania—used some form of pupil weighting for distributing state aid.[j]

---

[h] Other categories might include full-day kindergarten or other special needs programs.

[i] CGCS weights are a combination of GAO and Alexander weights.

[j] See *Public School Finance Programs in the United States and Canada: 1990-91*, compiled and edited by the Center for the Study of the States (1992).

BEST COPY AVAILABLE

The product of the foundation amount computed in Section A ($7,630) and the weighted or "virtual" enrollment of each LEA yields the amount of funding that would be equivalent to the resources available to the highest performing school districts in the state. The result is then divided by the actual enrollment, producing a per pupil expenditure for each LEA that more closely reflects the needs of the students in that district. None of the 33% high performing districts, however, would be adjusted upward or downward because they are assumed to be at the highest achievement levels already. The enrollments of all other school systems in the state are adjusted upwards in the same fashion. Printouts of the results for each LEA in Pennsylvania are found in Appendices B and C.

C. Local and State Share

Finally, the proposal determines how much of the "adequate" amount is paid for by the state and how much is paid for by the local community. Here, the assessed property values of the district are used as an indicator of district wealth and capacity to support public schooling. Districts with assessed property valued above the statewide average would be required to absorb 35% of the adequacy amount. Those with wealth below the statewide average would be required to raise 20%[*]. If a district chose to raise more, it would not be penalized. The Commonwealth, then, would be responsible for providing the remainder of the per pupil expenditure.

Philadelphia's total funding, according to this proposal, would increase by 37% from its current level of $6,860 per pupil to $9,403. Philadelphia's share of that amount would be $2,372 per student or $581,658,532. The proposal assumes that Philadelphia's federal allocation of $566 per student, or $120,401,962 total, would stay approximately the same. The remaining $6,105 per student, or about $1,299,625,703, would come from the state. The Commonwealth provided $3,548 per student, or $755,248,163, in 1995-96--leaving a gap of $2,557 per student, or approximately $544,377,540.

To ensure that each LEA in the state had resources equivalent to its highest achieving school districts, the Commonwealth would need to increase its current funding for public elementary and secondary education by about $2.6 billion or about 50% above 1995-96 levels. (The increase could be phased in.) Each LEA's state funding was held-harmless. Thus, 330 or two-thirds of the LEAs in the Commonwealth would realize increases in state aid, while no LEA would see its state aid decreased. And one-third or 170 LEAs in the state would see no changes in their state allocations.

Discussion

The total cost to the state of this proposal is approximately $544,377,540 for the Philadelphia Public Schools and statewide is $2.6 billion (including Philadelphia). Funding increases would range from 255% increase in the Williamsburg Community School District to 3.6% in the Troy Area School District; and would be felt in two thirds of the districts in the state whose performance is not as high as the other one-third. No district would be required under this proposal to raise local taxes, and no LEA would lose state funding.

The funding proposed under this system is presumed to include all state categorical monies spent for students living in or near poverty, for desegregation, special education students, limited English proficient students, and gifted and talented students. Including these funds in the foundation amount rather than in categorical streams provides local jurisdictions with more flexibility to direct educational resources where they are most needed. Moreover, folding categorical amounts into the foundation funding, once adequate, reduces paperwork and administrative burdens on the state and local school administration, and in some states may reduce the political imperative to disperse categorical funds broadly rather than concentrating them in districts in greatest need.

---

[*] These percentages can be adjusted to account for current local contribution rates.

The proposal could also result in less reliance statewide on a regressive local property tax, thereby lowering the degree to which poor communities indirectly subsidize the artificially low tax rates of wealthier areas. The proposal makes no recommendations on the use of the local property tax *per se*, but instead mitigates its effects.

Finally, the proposal made in this report closes the racial and funding gaps that were identified in Part I, without relying on a specific adjustment for race. A funding level of $9,403 per child would eliminate—by the time each child graduates from high school—the investment gap this report identified as existing between Philadelphia and its suburbs. Its effects are similar for other majority minority school systems in the state whose allocations are low.

The Council of the Great City Schools understands that the proposal made in this report has not yet benefited from a legislative review. It is offered, however, in the most concrete form possible so that its implications can be seen and discussed. It has also been offered as a way for the state and city to think about how it can make its funding more responsive to the poorest school districts, particularly those with enrollments that are majority minority.

Appendix A

Draft Legislation to Implement Proposed Funding Formula

AN ACT

Amending the act of _____, 19__ (P.L.__, No.__), entitled "An act relating to the public school system; amending, revising, consolidating and changing the laws relating thereto," further providing for definitions; and providing for a Commonwealth adequate funding system for education.

The General Assembly of the Commonwealth of Pennsylvania hereby enacts as follows:

Section 1. The appropriate section of the act of _____ (P.L.__, No.__), known as the Public School Code of 1949, is amended by adding clauses to read:

Section ____. Definitions.—For the purposes of this article the following terms shall have the following meanings:

* * *

(__) "Adjusted for inflation" means adjusted in accordance with the consumer price index and other factors reflecting changes in the cost of education around the State, according to a formula calculated by the State Department of Education.

(__) "Student living in or near poverty" means a student who is eligible to receive free or reduced price lunches under the National School Lunch Act of 1946 as amended.

(__) "Full-time equivalent enrollment" is calculated by adding:

a) the average of the total of all students enrolled in grades 1-12 in regular-day school programs on the first day of school during the previous school year and the enrollment figure for the same grade levels on the first day of school after January 1 during the previous school year; and

b) the average of the total of one-half of the number of students enrolled in half-day kindergarten and the total number of students enrolled in full-day kindergarten, on the first day of school during the previous school year and the corresponding enrollment figures on the first day of school after January 1 during the previous school year; and

c) the average of the total number of full-time equivalent students enrolled in evening high school programs on the first day of school during the previous school year and the corresponding enrollment figures on the first day of school after January 1 during the previous school year.

(__)"equalized Assessed Property Valuation" means the assessed property values for each local jurisdiction, equalized to account for differing local assessment practices according to the methodologies developed by the State Department of Revenue.

(__) "state" refers to the Commonwealth of Pennsylvania.

Section 2. The act is further amended by adding the following section to read:

BEST COPY AVAILABLE

Section ____. Commonwealth Equity Funding System for Education.—For the school year 1998-99 and every school year thereafter, each district shall receive payments in an amount determined by the tier-funding calculations in subsections (a) through (d) of this section annually adjusted for inflation.

(a) Tier I amounts shall be determined by multiplying the sum of subsections (i) and (ii) by the amount determined under subsection (iii) herein considered to be the foundation amount—

(i) the full-time equivalent enrollment in the district less the sum of the numbers of students living in or near poverty, the numbers of limited English proficient students, and the numbers of special education and learning disabled children enrolled in the district;

(ii) the sum of the numbers of students living in or near poverty multiplied by 1.2; the numbers of limited English proficient students multiplied by 1.1, and the numbers of special education students multiplied by 2.3 and learning disabled children multiplied by 1.15; and

(iii) the ratio of the sum of the total expenditures and the sum of the full-time equivalent enrollments of the districts in which at least one half of the schools had not less than 25 percentage of its 8th grade students with reading and math scores in the highest quartile on the Pennsylvania System of School Assessment in the preceding year.

(b) Tier II amounts shall be determined by multiplying the per pupil amount derived from subsection (a) by--

(i) 1.042 if the percent of students living in or near poverty in the district is equal to or greater than 50 percent; or

(ii) 1.021 if the percent of students living in or near poverty in the district is between 49 percent and 26 percent; or

(iii) 1.000 if the percent of students living in or near poverty in the district is equal to or less than 25 percent.

© Tier III amounts shall be determined by multiplying the per pupil amount from subsection (b) by—

(i) 1.000 if the enrollment is equal to or more than 100,000 students; or

(ii) 1.021 if the enrollment is between 99,999 and 5,000 students; or

(iii) 1.042 if the enrollment is equal to or less than 4,999 students.

(d) Local school district contribution to the amount determined in subsections (a) through (c) shall constitute—

(i) 20 percent of the foundation amount determined in subsection (a)(iii) of this section if the equalized assessed property valuation of the district is equal to or below the statewide average.; or

(ii) 35 percent of the foundation amount determined in subsection (a)(iii) of this section if the equalized assessed property valuation of the district is above the statewide average.

except that no district shall receive a state payment less than the amount such district received in the 1997-98 school year under PL ____.

Section 3. This act shall take effect immediately.

Appendix B

Results of Adequate Funding Model and Proposed Funding Remedy for the Commonwealth by County and District

Glossary of Terms

School District	A local educational agency within the commonwealth of Pennsylvania
County	County within the Commonwealth of Pennsylvania
EXP/ADM	Average per pupil expenditure based upon a school district's average daily membership
Adequacy	Per pupil amount necessary to provide each school district with the same equivalent resources as the highest performing school districts in the Commonwealth
Remedy	Per Pupil amount necessary to remedy or correct the funding imbalance among school districts within the Commonwealth
Local Rev	Revenues generated by the local educational agency to support its schools
State Rev	Revenues provided to school districts by the Commonwealth of Pennsylvania
Local Adeq	Share of adequate funding provided by the school district based on assessed property values
State Adeq	Share of adequate funding provided by the state based on assessed property values
State Remedy	State revenues needed to correct the funding imbalance of school districts within the Commonwealth (holding local revenues constant)
%Ch	Percent changes from current state revenues per district to proposed state revenues per district
[District]*	Districts marked with an asterisk have Remedy amounts that are less than current expenditures per pupil (EXP/ADM). This may be the result of deficits in the district, inaccurate revenue data or undetermined factors. If these districts were receiving revenues not reported under local, state, or federal revenues, they would not be included in this analysis.
